

Education Research Award

The WNRCSN Research Award was launched in 1998 by the Western Region Canadian Association of Schools of Nursing Executive and its members. The first award was granted in 1999. The WNRCSN Research Award is intended to support the research activities of WNRCSN members who wish to investigate issues related to nursing education.

Research Award:

One research award will be funded up to \$5000. It is expected that the research will be completed within a two-year period.

Criteria:

1. Applicants must be faculty members who hold active membership in WNRCSN as of September of the applicant year or prior to submission of the application.
2. The proposed research must relate to an aspect of nursing education and may be related to issues of importance to faculty members or students, strategies pertaining to teaching and learning, or curricular challenges.
4. Proposals that arise from graduate studies are not eligible for the WNRCSN Research Award. Faculty members who are members of WNRCSN and are also graduate students may apply to the Graduate Student Research Award to fund their theses, dissertations or projects related to their graduate studies.
5. Successful applicants will need to submit proof of ethics approval from their local IRB.
6. Research funds must be deposited into a research account with the successful candidate's educational institution. Funds will be sent to the successful candidate once the ethical approval certificate has been submitted to the WNRCSN Secretary.
7. Budget to include personnel and materials expenses only. Items such as conference expenses, teaching release, and office overhead (rent) are not eligible expenses. Please specify if funding is expected or has been obtained from other sources. Approximately 10% of the budget allowance may be moved from one line to another, as long as an explanation is provided to justify same.
8. If for any reason, the successful applicant cannot begin the project at the time the funds are awarded, or cannot be completed within two years, the award will not be deferred. In those circumstances, the award must be relinquished and the second-ranked applicant will be offered the award. Once the research has been initiated, an extension may be requested by emailing president@wnrcasn.ca.
9. Reports: It is expected that an annual report will be submitted to WNRCSN Executive outlining the progress of the study (i.e., completed activities, remaining activities, and expected date of completion). This report is due one year after the award date. Further, it is expected that a two-page summary report outlining the major findings will be submitted to WNRCSN Executive at the completion of the study.
10. As an award recipient, the successful candidate(s) will be asked to provide a recent photo and a one page project overview (300 words) to be posted on the WNRCSN website.
11. WNRCSN must be credited with funding support in all public dissemination of the project.
12. Decisions for awards will be based on the quality of the application
